# REVEALED: The UK areas where absolute child poverty has increased the most

- New research has revealed which UK areas have seen the biggest increase in children living in absolute poverty from 2014/15 to 2022/23.
- Gordon in Scotland is the parliamentary constituency where absolute child poverty has increased the most, with a 62% spike in children living in absolute poverty since 2014/15.
- Nottingham North is the UK area with the second highest increase in absolute child poverty, with a 50% increase since 2014/15.

Gordon in Scotland is the UK parliamentary constituency where absolute child poverty has increased the most, new research can reveal.

In Gordon, absolute child poverty has soared by 60% over an eight year period (from 2014/15 to 2022/23). In comparison, the average absolute poverty rate for all parliamentary constituencies in the UK has fallen by 0.01% since 2024/15.

The research, by homelessness and poverty charity Church On The Street, used the latest data from Parliament and the House of Commons to discover which UK constituencies had the highest increase in absolute child poverty between 2014/15 to 2022/23. The absolute child poverty rate refers to the percentage of children aged 0-15 in the constituency households where income is less than 60% of 2010/11 median household income.

The constituency of Nottingham North in the East Midlands has seen the second biggest increase in absolute child poverty. In Nottingham North, absolute child poverty has increased by 50 percent from 2014/15 to 2022/23.

Bassetlaw, also in the East Midlands, is third on the list of UK constituencies where child poverty has increased the most. Bassetlaw shows a 47.5% increase in absolute child poverty from 2014/15 to 2022/23.

The UK region of the East Midlands is home to six of the top ten parliamentary constituencies where absolute child poverty has increased the most. Amber Valley, Gainsborough and Rutland and Melton, all in the East Midlands, are third, fourth and fifth on the list of constituencies with the biggest increases in absolute child poverty, with an increase of 47.1, 42.4 and 42.2 percent respectively in absolute child poverty

between 2014/15 to 2022/23. South Derbyshire in the East Midlands also makes the list of top ten places with the biggest increases in absolute child poverty, coming eighth on the list.

At the other end of the scale, Beckenham in London is the UK parliamentary constituency where absolute child poverty has decreased the most, showing a 41.5% drop in absolute child poverty from 2014/15 to 2022/23. Foyle in Northern Ireland has enjoyed the second largest drop in absolute child poverty, with a 40.07% decrease in absolute child poverty rates.

Belfast East in Northern Ireland, Westminster North in London, and East Londonderry in Northern Ireland also reveal some of the biggest drops in child poverty levels, showing a 36.08%, 33.75% and 32.81% drop in absolute child poverty rates respectively.

Pastor Mick Fleming, founder of Church on The Street and author of his *Blown Away:* From drug dealer to life bringer said: "The levels of poverty we have seen children enduring over the past 8-10 years has been absolutely shocking. Absolute poverty is a state of deprivation that children and young people - especially in the 21st Century, in what is supposedly one of the richest countries in the world - should never even think of having to endure. The new government must move to change the unacceptable living conditions for children and their families, or we risk losing an entire generation".
